

## Safety tips

**All Clean Muskoka Together volunteers must read the safety information and understand what to do if they come across any hazardous items.**

- Protect yourself!
- Please do not go outside to clean in inclement weather such as thunder/lightening, high winds etc.
- Please stay off private property.
- Please avoid potential dangers such as embankments, railway tracks, rivers and riverbanks.
- Do not enter water bodies to retrieve items.
- Be mindful of vehicles when near or adjacent to a road.
- Please do not pick up dangerous objects such as broken glass, needles, liquids, hazardous waste, sharp objects or dead animals. If you come across any of these items or are concerned with items you see, please leave them where you found them and include the location in the Clean-up Report so we can follow up and they can be disposed of safely.
- If an item is too large to place in your specially marked garbage bag, please leave it where it is and include its location in the Clean-up Report.
