Muskoka Community

Let's Make Healthy Change Happen

May I make a referral to Muskoka Health Link for you?

Muskoka Health Link is a new initiative where a team of health care practitioners works with you, your family and/or your caregiver(s) to design a customized coordinated care plan, to ensure you receive the right care, at the right time, in the right place.

Your Care Team may include your primary care practitioner, the hospital, community care, long-term care providers, community support agencies, and other community partners.

You, with your Care Team, will plan your goals so that you are on the right path to good health and feeling well.

Muskoka Health Link will also support your Care Team to help overcome any barriers that may be preventing your goals from being met.

Here is a brochure that provides more information about Muskoka Health Link and the coordinated approach to your care. You may also visit the website (muskokahealthlink.ca) for additional resources.
