

Mountview Wastewater Treatment Plant and Huntsville Sewage Works Upgrades
Class Environmental Assessment

**2014 Class Environmental Assessment
Notice of Addendum and Public Information Session**

Study Overview

The District Municipality of Muskoka completed a Class Environmental Assessment (Class EA) in 2014 that identified a Preferred Solution to upgrade the Wastewater Treatment Plant (WWTP) infrastructure capacity to meet the requirements of the community. As documented in the Environmental Study Report, the Preferred Design Concept consisted of three major components:

- Decommission the Mountview WWTP, construct a new sewage pumping station (SPS) at the Mountview site
- Construct a new forcemain between the new Mountview SPS and Golden Pheasant WWTP; and
- Upgrade the Golden Pheasant WWTP to expand the capacity and improve effluent quality. Additionally, asset maintenance will be undertaken to address required equipment and infrastructure replacements and maintenance.

Addendum to the Preferred Solution

The District Municipality of Muskoka is undertaking an update to the 2014 Class EA in the form of an official Addendum. This Addendum proposes a relocation of the current Golden Pheasant WWTP outfall from the mouth of the Muskoka River to the east/central basin of Fairy lake. Additionally, it is suggested that the current Golden Pheasant WWTP outfall pipe be re-purposed as the conveyance forcemain between the anticipated Mountview SPS and Golden Pheasant WWTP.

Please note that only those topics proposed in the Addendum are open for review.

Public Information Session

The District is hosting a Public Information Session to provide members of the public and other stakeholders with an update on the project and the changes being proposed. The Public Information Session will be held at:

November 29, 2018
Time: 6:30 PM – 8:30 PM
Location: Partners Hall, Algonquin Theatre
37 Main Street E, Huntsville, Ontario
P1H 1A1

To submit comments or questions regarding the update or the environmental assessment process, please contact the project consultant team:

Emily Gallant
