

# IMPORTANT NOTICE

## Installation of water meter reading devices (MXU)

Currently, The District of Muskoka is conducting the installation of water meter reading devices (MXU) on select properties in Bracebridge, Gravenhurst, Huntsville.

This will encompass District hired contractors from **Wamco Municipal Products** entering onto the property to install the new device over the existing external reading device. Contractors do **not** require entry inside the house.

The new reading devices will allow The District of Muskoka to accurately record water meter readings by simply driving by the property and will eliminate estimated bills and the need for meter readers to access the property in the future.

This MXU unit must remain on the premise. Units that are removed, lost or damaged are replaced at the customer's expense. Your cooperation in helping complete this upgrade is greatly appreciated.

If you have any questions or concerns, please visit our website at [www.muskoka.on.ca/WMUpgrades/](http://www.muskoka.on.ca/WMUpgrades/) or email the District of Muskoka Public Works Department at [publicworks@muskoka.on.ca](mailto:publicworks@muskoka.on.ca)
